2011 Audi Q7 Fuel Pressure

I have a Q7 V6 TDI with fuel rail pressure too low. I have tested the fuel supply from the fuel tank, volume and pressure are found to be okay. The Ross-Tech diagnostic came up with fuel rail too low, debating if it is the high Pressure Pump or the sensor fault and if there are any way of testing the sensor, but i really think it is the Pump.

Greetings, I was wondering if anyone can explain how to properly diagnose the N276 solenoid on top of the HPFP? I ran the N276 output test via VAGCOM with the engine off. I heard the N276 clicking however I am still suspicious. What other gauntlet of tests can I perform to determine whether or not the N276 is functioning properly. Thanks!
