Bacterial

Classification

Bacteria are most times classified as prokaryotes, which are unicellular organisms that lacks membrane bound nucleus. Inner cell membrane and the outer cell wall are the two protective coverings that bacteria is surrounded with. Some bacteria do not have a cell wall at all.

Bacterial

Classification

Bacteria are single-celled microorganisms with the absence of the nucleus and other cell organelles; hence, they are classified as prokaryotic organisms. They are also very versatile organisms, surviving in extremely inhospitable conditions. Such organisms are called extremophiles.
