Laser ablation is one of many types of laser process that our fiber lasers can perform here at SPI Lasers. While bearing many similarities to other processes, such as laser cleaning, it is an important method in its own right.. It has grown to have many uses, and so has likely had an impact on all of our lives in some way.

### Laser Ablation Applications | Practical Uses | SPI Lasers

Shortly after the demonstration of the first laser, the most intensely studied theoretical topics dealt with laser-matter interactions. Many experiments were undertaken to clarify the major ablation mechanisms. At the same time, numerous theoretical studies, both analytical and numerical, were proposed to describe these interactions. These studies paved the ways toward the development of ...
