In 11g, Oracle
introduced the Active
Data Guard feature.

This allows the standby
database to be open in
read-only mode, but

still apply redo
information. This
means a standby can
be available for

querying, yet still be up

Downgrading Databases in an Oracle Data ...

Data Guard is Oracle 12c's true disaster protection technology.

In it, you have a minimum of two

databases, primary and standby. Data

Guard has options for multiple standby sites

as well as an active-active configuration.

By active-active, it means both/all sites are up, running, and

12c Data Guard in 11g - KTEXPERTS

The first time the broker starts on Oracle Database 12 c Release 1 (12.1) it detects the existence of the Oracle Database 10 g and Oracle Database 11 g broker configuration files. It automatically upgrades them to include any new properties that were introduced in Oracle Database 12 c Release 1 (12.1).
