The closest thing you can do is use the Authors dropdown in the navigation bar to browse by authors—and even then, you'll have to get used to the terrible user interface of the site overall. Protists Lab Answer Key

Protists Lab Answer Key - portal-02.theconversionspros.com

Protists are classified based on two factors: how they obtain nutrition and how they move. These classification factors lead to three protist categories: - Animal Like Protists ("Protozoans" or "First Animals) - Heterotrophs - Plant Like Protists ("Algae") - Autotrophs - Fungus Like Protists - Decomposers

Protist Observation Lab

Carolina LabSheets™. In this lab, students observe a variety of protists and record basic observations of them. Traditionally, protists were classified under Domain Eukarya, Kingdom Protista, and were divided into phyla mainly on the basis of their mode of locomotion. However, it has long been recognized that Protista is not a natural grouping, and that mode of locomotion has little bearing on the evolutionary relationships within these organisms.
