SKELETAL SYSTEM The skeleton is constructed of two of the most supportive tissues found in the human body—cartilage and bone. Besides supporting and protecting the body as an internal framework, the skeleton provides a system of levers that the skeletal muscles use to move the body. In addition, the bones provide a stor-

Skeletal Muscle Structure and Function

Skeletal muscle (also called striated or voluntary muscle) is organized into bundles of muscle cells or fibers. Each fiber is a single cell with many nuclei and each fiber is itself a bundle of smaller myofibrils arranged lengthwise.
