The Second Agricultural Revolution Reclaiming

Throughout the Second Agricultural Revolution, new ideas sprung up, like selective breeding, fertilizing crops, and rotating crops. They also began reclaiming land, which made farming more intensive and efficient. Meanwhile, farmers during the Second Agricultural Revolution started to replace crops that yielded low harvests (such as rye) with crops that yielded highest harvests, such as the cereal grains of barley and wheat.

What Was The Second Agricultural Revolution? - Watt's Hott
